

PHYSICAL ACTIVITY GUIDELINES

The U.S. Department of Health and Human Services recommends the following minimum physical activity levels to improve the nation's health; see <http://www.health.gov/paguidelines/guidelines/summary.aspx>.

For children and adolescents

Sixty minutes or more of physical activity such as running daily.

Muscle- and bone-strengthening exercises such as push-ups at least three days per week.

For adults

All adults should avoid inactivity; some physical activity is better than none.

At least 150 minutes per week of moderate-intensity activity such as a brisk walk or 75 minutes per week of vigorous-intensity activity such as running.

Moderate- or high-intensity muscle-strengthening activities two or more days per week.

For specific populations

Older adults, those who are pregnant, and/or those with disabilities should consult their physicians and the modified guidelines.

Cancer survivors should consult their physicians and follow modified guidelines adapted for their specific cancers and treatments.
